

December 29, 1930.

Mr. F. A. Porter,
Orderville, Utah.

Dear Mr. Porter:

RE: LONG VALLEY DIST.

I have your letter of December 26 with reference to extra work performed as commissioner for Long Valley.

To keep out of difficulties it has been necessary for me to have an iron clad rule that there is to be no compensation in excess of the agreed amount unless the extra money involved is directly contributed by the water users. In your case it so happens that there are sufficient funds to take care of this extra bill after allowance has been made for the \$13 credit which you have collected and I am, therefore, enclosing check for \$9.00 and also the voucher which I wish you would have signed before a notary and return to me.

Should a like situation come up again be sure and make it plain to the water users that they will have to put up the extra money and this does not mean sending in some of the delinquent past assessments.

Yours very truly,

State Engineer.
